

1st
**LEFT
MAIN
SUMMIT**
2007 _Final Program

August 24-25, 2007

Venue_ The Shilla Jeju Hotel, Jeju Island, Korea

1st LEFT MAIN SUMMIT 2007

August 24-25, 2007

“ The New Roadmap of Treatment for Left Main Disease”

All the LM data from the past and present,
Meta-Analysis of LM Intervention,
And Future Perspectives...

COURSE OVERVIEW

The First Left Main Summit 2007 is a two-day scientific program dedicated to the evolving field of the Unprotected Left Main Coronary Artery Disease. During this comprehensive conference, leaders in the field from all over the world will convene to present their work, experiences, observations, and opinions on this challenging and unique field.

LEARNING OBJECTIVES

After the conclusion of this course, physicians can be able to

- Identify the clinical considerations associated with left main coronary artery disease
- Discuss diagnostic and treatment options for left main coronary artery disease
- Describe PCI strategy and other adjunctive devices in angioplasty
- Recognize clinical study results and stage of efficacy trials

TARGET AUDIENCE

This conference is designed for Interventional cardiologist, Cardiologist, Physicians interested in cardiology and vascular medicine, Basic scientist and Other health care professionals specialized in the endovascular field.

CONSENSUS DOCUMENT

This document will be produced by the working group; the invited faculty of the meeting as well as the opinion leaders of the field and circulated through the prominent journals.

VENUE & EXHIBIT

PROGRAM >>>

DAY_1

FRIDAY,
August 24
Agenda

Halla Hall A

11:00 PRE-COMBAT Investigators' Meeting.....(Halla Hall B)

12:00 Registration & Lunch Buffet.....(Exhibit Hall)

13:00 Opening Remark and Introduction

13:08 Goals of the Meeting and Consensus Report

*Seung-Jung Park
Martin B. Leon*

PATHOPHYSIOLOGY & DIAGNOSIS: Morphologic and Physiologic Assessment

Moderators: Gary S.Mintz, Seung-Jea Tahk

13:15 Epidemiology and Natural History

13:30 Anatomy and Histopathology

13:45 Non-Invasive Diagnosis: Exercise Stress EKG, Echo, Radio-Isotope Test

14:00 Non-Invasive Diagnosis: CT, MRI

14:15 Invasive Diagnosis: Role of IVUS in Diagnosis

14:30 Invasive Diagnosis: Role of IVUS in Treatment and Follow-Up

14:45 Invasive Diagnosis: Role of VH in Left Main Disease

15:00 Invasive Diagnosis: Physiologic Study Using CFR, FFR

15:15 Discussion

*Cheol Whan Lee
Gaku Nakazawa
Jae-Kwan Song
Byung Wook Choi
Gary S. Mintz
Myeong-Ki Hong
Duk-Woo Park
Seung-Jea Tahk*

PCI STRATEGIES I

Moderators: Eberhard Grube, Seung-Jung Park

15:35 Ostial Lesion and Body

15:47 Bifurcation Lesion Classification

15:59 Left Main Bifurcation PCI with Single Stent : Crossover

16:11 Left Main Bifurcation PCI with Two Stents

16:23 Left Main Bifurcation PCI: Single Stent vs. Two Stents

16:35 AMC Bifurcation Registry: Left Main vs. Non-Left Main Bifurcation Treatment

16:47 Insights into Bifurcation Strategies From 3D Imaging

16:59 Discussion

17:19 Break and Visit Exhibits

*Seung-Jung Park
Angela Hoyer
Myeong-Ki Hong
Eberhard Grube
Young-Hak Kim
Myeong-Ki Hong
John Ormiston*

PCI STRATEGIES II

Moderators: Carlo Di Mario, Seong-Wook Park

17:35 Trans-Radial Maybe Enough?

17:47 Trans-Femoral Should Be Better?

17:59 Effect of Debulking for Left Main Disease: PERFECT Registry

18:11 Treatment of ISR in Left Main Disease

18:23 Treatment of Left Main Complications

18:35 Adjunctive Pharmacological Therapy

18:47 Mechanical Support in Left Main Intervention

18:59 Discussion

19:20 Adjourn

*Chiung-Jen Wu
Takahiko Suzuki
Etsuo Tsuchikane
Carlo Di Mario
Yasushi Asakura
Seong-Wook Park
Alaide Chieffo*

7:00

Halla
Hall A**BREAKFAST CASE REVIEWS**

Moderators: Carlo Di Mario, Seung-Jung Park

Discussants: Yasushi Asakura, Myeong-Ki Hong, Vincent On-Hing Kwok, Marie-Claude Morice,
Sunao Nakamura, Marc Silvestri, Marco Valgimigli, Chiung-Jen WuCase Presenters: Duncan Hung Kwong Ho, Marie-Claude Morice, Teguh Santoso,
Etsuo Tsuchikane, Chiung-Jen WuHalla
Hall B

Moderators: Eberhard Grube, Takahiko Suzuki

Discussants: Jun-Jack Cheng, Eulogio Garcia, Junbo Ge, Angela Hoye, Takeshi Kimura, Matthew Price

Case Presenters: Runlin Gao, Eulogio Garcia, Angela Hoye, Takeshi Kimura, C. Raghu

8:15

Break and Visit Exhibits**CURRENT STATUS OF LEFT MAIN PCI**

Moderators: Martin B. Leon, Seung-Jung Park

8:30

MAIN-COMPARE Registry: DES vs. BMS

8:40

Scripps Experience

8:50

Rotterdam Experience

9:00

Milan Experience

9:10

Columbia University Experience

9:20

Japan Experience

9:30

TAXUS Left Main PILOT Registry

9:40

Gregario Maranon TAXUS Registry

9:50

TRUE Registry of TAXUS Stent

10:00

Ostial Left Main Multicenter Registry

10:10

CYPHER vs. TAXUS for Left Main Bifurcation

10:20

Meta-Analysis; Overall Safety and Efficacy Issues of Left Main Intervention

10:30

Discussion

OTHER ISSUES OF LEFT MAIN PCI

Moderators: Adnan Kastrati, Marie-Claude Morice

10:50

Primary Angioplasty for LMCA MI

11:02

Rare Cause of LMCA Stenosis and PCI

11:14

Risk Stratification of Patients and Lesion; Left Main Scoring System

11:26

Clinical Trial Design Issues in Left Main Trials: Stents vs. Surgery

11:41

Compliance to Current ACC/AHA or ESC Guidelines for Left Main Treatment

11:56

Discussion

12:15

Halla
Hall A**LUNCHTIME CASE REVIEWS**

Moderators: Martin B. Leon, Ki Bae Seung

Discussants: Alaide Chieffo, Runlin Gao, Eberhard Grube, Michael S. Lee, Gary S. Mintz,
Seong-Wook Park, Teguh Santoso, Etsuo TsuchikaneCase Presenters: Junbo Ge, Eberhard Grube, Michael S. Lee, Sunao Nakamura,

JEJU-NATURE'S PARADISE IN THE ASIA PACIFIC

Jeju surrounded by sea on all sides, is categorized as a volcanic island in subtropical zone. Jeju displays a temperate oceanic climate because the Kuroshio Current and the Tshushima current have a direct effect on the island.

Jeju has a mild oceanic climate throughout the year with the smallest annual temperature range in the country.

Jeju is 73km wide and 41km long with a total area of 1,848 Jeju the largest island in South Korea, came into existence 700 to 1,200 thousand years ago when lava spewed from a sub-sea volcano and surfaced above the waters. Then 100 to 300 thousand years ago, another volcanic eruption formed Mt. Halla. The final volcanic eruption that took place approximately 25 thousand years ago created the crater lake, Baekrok-dam, at the summit of the mountain. Mt. Halla rises in the center of Jeju to 1950m above sea level. The fantastically shaped rocks decorating the seashores, the hundreds of Oreums(secondary volcanos) and the rarest species of flora around the Baekrok-dam lake in Mt. Hallasan are all treasures waiting to be discovered by visitors. One cannot see Jeju unless one looks.

Mt.Hallasan

Mt.Hallasan stands tall in the middle of Jeju Island. It is also called Mt.Yeongjusan, meaning a mountain high enough to pull the galaxy. Mt.Hallasan is widely acknowledged by scholars for its research values. Designated as a National Park in 1970, there are 368 arasitic mountains called "Ohreum(peaks)" around Mt. Hallasan. With a circumference of 2,000m and a depth of 100m, climbing Mt. Hallasan allows you to see virtually all of the island Jeju. Mt.Hallasan is a short climbing course. Less than 10km in length, it is possible to reach the peak and come back down in one day. But the weather conditions often change and there is a lot of wind, so you must be well prepared.

Jungmun Tourist Complex

Jungmun Resort is a multi tourism area of Jeju Island and the largest resort in Korea. It is located on the seashore of Jungmun area in Seogwipo. In the Resort, there are many interesting sites to visit, such as Pacific Land, Yeomiji Arboretum, fishing village for tourists, Seonimgyo Bridge, Cheonjeyeon waterfall, and Jungmun Beach. This arboretum has 2,000 kinds of rare plants in the greenhouse, and 1,700 kinds of flowers and trees outside. A tour tain can be used between the arboretum and the garden, and if you go up to the sky lounge in the middle of the garden, you can see the whole arboretum.

Tours & Activities

▶Golf Rounding & Riding

▶Scuba Diving & Wind Surfing

▶Pillar-shaped Joint & Cruise
